

RUNNING SQUID

Length: 1 day

Description: This course gives you an introduction to the Squid proxy server. After this 1 day training you will be able to set up your own webcaching proxyserver.

Topics:

- Introduction to Web traffic and Proxy servers
- Proxy Cache Design
- Installing Squid
- Configuring Squid
- Configuring clients to work with Squid
- Monitoring Squid

Who should attend: Linux users; whether a developer, system administrator, support team member or network administrator. This course is designed to provide a solid stepping stone to Squid.

Prerequisites: Delegates should have a working knowledge of a Unix environment (LINUX, Solaris, HP-UX, AIX, ...). This can be gained from attending our Linux Fundamentals course. Practical knowledge of TCP/IP concepts. This course has not been designed with IT novices in mind.

Course style: Hands-on, practical approach
